

TECHNO ENGINEERING SOLUTIONS (TES)

Engineering &
Industrial Solutions

OUR IDENTITY

We are a premier electromechanical solutions provider dedicated to delivering engineering excellence across complex infrastructure projects.

Specializing in mechanical, electrical, and plumbing (MEP) systems, we bridge the gap between advanced engineering concepts and flawless execution.

From initial design and precise fabrication to seamless installation and maintenance, we build the core systems that keep modern industries, commercial hubs, and urban infrastructure moving forward.

OUR SERVICES

Techno Engineering Solutions (TES) provides project management, planning, engineering, and related services to clients involved in F&B, Pharmaceutical and Oil & Gas industries

- Turn key Electro-Mechanical projects
- In process - operation Management
- Supplying material
- HVAC systems
- Fire Fighting Systems
- Engineering & Design
- MEP Works
- Steel works

HSE POLICY

At [TES], we believe that outstanding engineering performance is inseparable from world-class safety practices.

Our 'Zero Harm' policy is built into every phase of our electromechanical operations, ensuring the protection of our workforce, subcontractors, clients, and the communities in which we operate.

QUALITY ASSURANCE & QUALITY CONTROL (QA/QC)

Our Quality Philosophy

In electromechanical contracting, precision is everything. A minor variance in an electrical load or a piping weld can compromise an entire facility. Our QA/QC framework ensures that every mechanical, electrical, and plumbing system we install operates at peak efficiency, strictly adhering to local regulations and international standards.
